## **POSSIBLE MOTION**

I move to award the contract for the rubberized chip seal on Longhorn Road from Highway 87 to McLane Road to International Surfacing Systems and authorize the Mayor to sign all necessary contract documents.

## **SUMMARY OF THE BASIS FOR POSSIBLE MOTION:**

Longhorn Road between Highway 87 and McLane Road is experiencing a lot of asphalt cracking and pot holes. This section of roadway received one of the lowest condition ratings by the Street Task Force that has completed an inventory of all Town streets. Staff has determined that a polymer modified rubberized chip seal will greatly improve this street surface at a minimal cost. Since the cost of the project was estimated to be more than \$25,000, it was put out to bid.

We received 3 bids on May 3, 2007. A complete bid tabulation is attached. Following is a summary of these bids:

<u>Contractor</u>	<u>Total Bid</u>
International Surfacing Systems	\$65,707.70
Cactus Transport	\$67,893.10
Sunland Asphalt	\$78,671.25

All of the bidders are reputable contractors capable of providing the Town with an excellent product. The bid amount is based on estimated quantities and the final cost may vary from the actual bid amount.

Funding for this project will come from the current fiscal Pavement Preservation budget.

Staff recommends awarding the Bid to International Surfacing Systems.

MAY 17 2007 H.I.
