

TOWN OF PAYSON, ARIZONA
EMERGENCY OPERATIONS PLAN
EMERGENCY SUPPORT FUNCTION ANNEXES

General

Standard Operating Guidelines will be developed and maintained by the Fire Department, which has primary functional responsibility for this ESF. This function will be coordinated with and involve other support agencies and organizations. The legal duty for reporting, containing, and clean up of a hazardous materials incident rests with the party responsible for the material prior to the incident.

Organization

The ranking Fire Department officer on the scene will assume command of all hazardous materials incidents until a unified command structure and ICP can be established. The ICP will coordinate actions and requests with the Emergency Operations Center and ESFs 5, 6, 13 and 15 as required.

Actions/Responsibilities

- Review procedures for hazard material incident.
- Record expenses
- Prepare a facility profile and inventory of potential hazardous materials.
- Identify potential contacts and resources in order to conduct a community vulnerability analysis to determine potential hazardous material threats and on-site inspections;
- Plan for response to hazardous material incidents and coordinate with other first responders;
- Develop procedures for identification, communications, warning, public information, evacuation, control, and clean-up of hazardous materials;
- Obtain training for response personnel available through Arizona Division of Emergency Management, manufacturers, and shippers of hazardous materials;
- Participate in drills and exercises to evaluate mass care and shelter response capability.
- Verify incident information and notify Gila County Local Emergency Planning Committee and other applicable agencies;
- Establish a command post at a safe distance near the scene or staff the EOC, if the situation becomes excessive;
- Provide further information on the situation to Gila County Department of Emergency Management and convey warnings for dissemination to the public;
- Request assistance for emergency health and medical, as well as mass care, if the situation warrants;
- Ensure availability of expertise and equipment to manage the incident; utilize proper procedures for containment and cleanup to prevent additional dangers;
- Support response teams, owner, shipper, state, and/or federal environmental personnel during cleanup;
- Establish area security and prohibit all unauthorized personnel from entering the containment area;
- Terminate cleanup operations after dangerous situation subsides; and
- Maintain records of expenditures and document resources utilized during recovery.
